DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Kawamura et al. (JP2001-103644).

Re claim 1, Kawamura et al. discloses a device comprising:

a case (21) having a base wall, front wall, rear wall, pair of side walls and a cover for receiving a wire harness having an inlet formed in a side wall adjacent the rear wall, and an outlet formed in the rear wall for the wire harness (see annotated figure 6 below), said inlet being perpendicular to the outlet;

an urging member (26 for example) for urging the wire harness toward an inside of the case; and

a harness roller (unnumbered see annotation for example) around which the wire harness being rolled, said harness roller reciprocally moving under acting forth of the urging member,

wherein a space for receiving a folded part of the wiring harness, formed by forming an overlap and then bending the wiring harness 90 degrees, is provided between the case and the urging member (see figure 6 for example);

Art Unit: 2174

wherein the folded part of the wiring harness is led into the case through the inlet and received in the space (see figure 6 for example).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 2 is rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Kawamura et al.

Re claim 2, Kawamura et al. discloses device, wherein a center axis of the urging member is displaced from a center plane of said harness roller in a direction of

Art Unit: 2174

thickness of the device for providing a large said space for receiving the folded part of the wiring harness (see figure 6 for example) . Or alternatively, the device of Kawamura et al. discloses the claimed invention except wherein a center axis of the urging member is displaced from a center plane of said harness roller in a direction of thickness of the device for providing a large said space for receiving the folded part of the wiring harness. It would have been an obvious matter of design choice to use a center axis of the urging member displaced from a center plane of said harness roller in a direction of thickness of the device for providing a large said space for receiving the folded part of the wiring harness in order to receive a folded part, since such a modification would have involved a mere change in configuration. A change in shape or configuration is generally recognized as being within the level of ordinary skill in the art. *In re Daily*, 149 USPQ 47 (CCPA 1976).

Response to Arguments

5. Applicant's arguments with respect to claims 1 and 2 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

Art Unit: 2174

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
